European Union Deforestation Regulation

How-to: Share geolocation information in LPA

A geolocation sharing tool has been introduced into the Livestock Production Assurance (LPA) program in response to the upcoming European Union Deforestation Regulation (EUDR).

The EUDR aims to limit the EU's impact on global deforestation, forest degradation and biodiversity loss by promoting deforestation-free supply chains.

To comply with these new regulations, Australian cattle producers who wish to have their livestock available to the European market will need to provide their geolocation data (longitude and latitude coordinates) in their LPA account. Follow these steps to share your geolocation.

Log in to your LPA account via my	ЛLА.	3 Scroll to 'Share Geolocation for Land Manage and click 'Share'.	ement &
