

October 2024

Livestock that have died on property

Related Tech Tips:

- Deceased Destination PIC
- Deceased livestock on PIC report
- Lost or stolen cattle or devices

If livestock with electronic devices die or are destroyed on a farm or feedlot, use the **Livestock that have died on property** transaction to notify the database. **Do not notify the database that animals are deceased unless you are certain.** If they actually moved off the property and the device numbers are submitted in another transaction, a database error occurs and action is necessary to 'resurrect' the animals.

Note: **If animals are 'missing', use the Device status transaction** to assign the IA (Inactive) status to the devices. If the animals are found, use the same transaction to remove the IA status (turn it 'Off'). If you suspect cattle may have been stolen, report the matter to the Police. If you provide device numbers, they can assign an S (Stolen status). Otherwise, an SI status applies (Presumed stolen but may have strayed).

Login to the database at www.nlis.mla.com.au

- 1 Enter your NLIS user ID and password and click **Login**
- 2 Select the livestock type to work with.
- 3 Select Livestock that have died on property and click **Go**
- 4 Choose one of two methods to submit the device numbers of the dead animals to the database:
 - Click **type in the details** to type or paste details into fields on the screen. (See steps 1-2 below)
 - Click **choose from the list** to choose from a list of tag numbers for a PIC (See page 2)

Type in the details method

- 1 Enter details in all fields, then click **Continue** or click **Back** to return to the previous screen.
- 2 Follow the prompts to confirm the details and **Send** them to the database.

Type the NLISID or RFID number here and press the Enter key after each device to transfer it to the box below. Leave a space after the first three characters of RFIDs e.g. 982 000090788496

OR copy tag numbers to your clipboard (Ctrl + C or Command + C) and then paste them here (Ctrl + V or Command + V). If you make a mistake, highlight incorrect tag numbers and press the Delete key.

Livestock that have died on property - Choose from the list method

You can use this method to move tags for one or many dead animals off the current holdings for a PIC.

Choose a list to view

1 Choose one of three lists to view.

Note: If you choose 'livestock moved onto' or 'livestock bred on', also choose a date range.

Tick this box to only show active devices.

2 Select the PIC on which the cattle died.

3 Click **Continue** to proceed to the next screen.

4 Tick the boxes for the tags of the animals that dies on that PIC.

5 Click **Continue** to proceed to the next screen.

Choose your livestock Step 1 2 3 4 5

The following livestock were **all livestock currently on** your PIC: **NA023191**.

Which livestock have died on property?

Select the livestock you want to record as having died on property from the following list by clicking the check box () in the first column. You can also remove a tick by clicking on it. Click 'Continue' when you have finished. Click 'Back' if you want to request a different list of cattle.
