

A new NLIS database

Work is underway to upgrade Australia's National Livestock Identification System (NLIS). This world-leading traceability platform has met the Australian livestock industry's traceability needs for the past two decades but it is time for an upgrade.

With the support of a \$22.5 million Australian Government funding grant, Integrity Systems Company (ISC) is now working with industry to deliver a user-friendly and future-proofed NLIS.

The new NLIS will allow livestock to be tracked from property of birth to slaughter for biosecurity, food safety, product integrity and market access purposes for decades to come

While the new system is being built, there will be no impact to the existing NLIS.

WHAT TO EXPECT:

User experience

Easier to use and more intuitive, saving you time and making compliance easier. This means less screens to click through to update information or see reports.

Traceability

Near real-time traceability will protect your operation in the event of a food safety issue or disease outbreak.

Minimal downtime

Rapid auto-recovery mechanisms in place in the event of service disruption.

Seamless transition

Progressive rollout of new features delivered seamlessly for ease of use.

eNVD integration

Works with the LPA electronic National Vendor Declaration and third-party systems — another time saver when livestock are on the move.

Role-based access

Assign employees or consultants with tailored NLIS access depending on your business requirements.

Security enhancements

Improvements to further protect sensitive data and block unauthorised access.

Same core functions

A modern system with the same core functions.

Here's a look at the road ahead:

JUN 24 - SEP 24

Platform design begins

Software designers draw up plans for the new platform

OCT 24 - DEC 25

Time to build

Regular showcases held to gather feedback during build

JAN 25 - JUN 26

Staged transition

Data migrated to new NLIS and features progressively rolled out

JAN 26 - JUN 26

Closing the old NLIS

Original NLIS decommissioned in tandem with new platform release

JUL 26

New NLIS fully operational

We made it. New NLIS delivering vast efficiency and traceability benefits
